ART REJECTION:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 45-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over lihoshi et al(6,032,097).

-- In considering claims 45-65, the claimed subject matter that is met by lihoshi et al(lihoshi) includes:

1) the wireless transmitter is met by the communication devices(7,11);

2) the measurer and rudimentary ranging information determiner for determining ranging information from a round trip delay time is met(see: column 10, lines 6 et seq).

lihoshi does not specifically teach a piconet. The examiner takes Official Notice that in the vehicle communication art, use of a piconet for intercommunication is well known, and therefore, since lihoshi already desires to platoon vehicles, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a piconet into the communication devices of lihoshi, since this would have facilitated communication in the system through use of a well known, reliable, and inexpensive communication means.
